(54) METHOD AND DEVICE FOR EXPANDING WWW BROWSER FUNCTION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a function
expanding method of a WWW browser which grasps a
read state of a user externally without newly developing
or altering a WWW browser and further adds a new
function by utilizing the information.
SOLUTION: This method is realized in a relaying device
100 on a communication route of a WWW server 200 and
a WWW browser 300 in the case of expanding a function
that shows information which is acquired by the browser
300 from the server 200. That is, an instruction which is
described on response information from the server 200
in response to a request from the server 300 in a
language that can be interpreted by the browser 300 and
includes a part that is produced in accordance with
communication content is embedded, and when the
instruction is carried out, a read state of a user is
acquired outside the browser 300 by using the part that
is produced in accordance with the communication
content. Thus, the function of a WWW browser is
expanded.
